ABOUT ME

Results-driven Software Engineer with a proven track record in developing and maintaining robust software solutions. Proficient in troubleshooting and resolving software issues to ensure optimal product stability and performance. Skilled in designing scalable and secure applications. As a dedicated student of Software Engineering, I consistently strive for excellence. I am a responsible and detail-oriented individual eager to explore new challenges.

WORK EXPERIENCE

Flutter Developer Intern

DeshIT-BD [02/07/2023 – 31/10/2023]

City: Mohammadpur

Country: Bangladesh

- Acquired foundational knowledge of the Flutter framework and Dart programming language through intensive training sessions and workshops.
- Collaborated with senior developers to contribute to the development of mobile applications using Flutter.
- Implemented API integration to fetch and display dynamic data in real-time, enhancing app functionality.
- Utilized Firebase for backend services, including authentication, real-time databases, and cloud functions.
- Implemented state management using GetX, optimizing app performance and providing a seamless user experience.
- Participated in code reviews, ensuring adherence to best practices and contributing to the improvement of code quality.
- Worked on the implementation of user interfaces (UI) and user experiences (UX) based on design specifications, fostering collaboration with design teams.
- Assisted in debugging and troubleshooting application issues, gaining practical experience in identifying and resolving technical challenges.

Jr. Flutter Developer

DeshIT-BD [01/11/2023 – Current]

City: Mohammadpur

Country: Bangladesh

- Contribute to the development and enhancement of mobile applications using Flutter, demonstrating proficiency in Dart programming language.
- Implement robust API integration to fetch and manage dynamic data, ensuring seamless functionality within the apps.
- Leverage Firebase for backend services, encompassing authentication, real-time databases, and cloud functions.
- Apply advanced state management techniques with GetX, optimizing app performance and ensuring a smooth user experience.

- Collaborate with cross-functional teams, including senior developers and design teams, to implement UI/UX based on design specifications.
- Participate in code reviews, adhere to best practices, and contribute to the continuous improvement of code quality.
- Lead debugging and troubleshooting efforts, showcasing problem-solving skills and contributing to the resolution of technical challenges.
- Actively stay updated on Flutter and related technologies, incorporating new features and best practices into development workflows.
